Winsted Introduces Insight Consoles for High-Density Control Rooms

MINNEAPOLIS, April 10, 2010 — The latest addition to Winsted's Prestige Series, the Insight line of consoles boasts a compact profile that is ideal for high-density, high-performance command/control environments.

Insight consoles maximize control room functionality with a space saving design that is modular, expandable and customizable. Winsted designers reduced the depth of both the chase and the work surface on the popular Sight-Line console to create a solution with a more efficient footprint that meets ergonomic standards, and provides ample desktop workspace.

Insight consoles feature Winsted's innovative Versa-Trak monitor mounting system, which allows users to easily modify sightlines and viewing angles based on the needs of each operator. All Insight consoles come standard with Winsted's exclusive TruForm Endurance Edge™ work surface and TruForm decorative end panels, both are available in a variety of colors and shapes. A new Comfort Edge™ work surface, featuring a contoured urethane edge, is also available in a variety of colors.

Additional features of new Insight consoles include:

- Double-panel doors sturdy enough to support a CPU shelf or file/storage bin
- Openings for universal data mounting plates and duplex power outlets, conveniently located at the back of the work surface
- Easy-access cable raceway standard, plus optional drop-down interior tray for additional cable management

Winsted catalogs are available in print or PDF format by calling 1-800-447-2257 or e-mailing info@winsted.com. Log on to www.winsted.com/quote for a free online technical furniture quote. Winsted's equipment layout software (WELS) is available for free at: www.winsted.com/wels. For more information on Winsted products, visit www.winsted.com.
