CUSTOM: CONSOLE

A WORLDWIDE LEADER IN CONTROL ROOM CONSOLE SOLUTIONS

No matter what your oil or gas control room application, Winsted offers a command console solution that can be tailored to meet your exact specifications. Let us help you build your ideal control room with modular command consoles and workstations. Our ergonomic control room furniture can be customized to fit both your technical and aesthetic requirements. For the most extraordinary needs we also offer entirely custom control room designs, manufacturing and installation.

Our control room designers combine the disciplines of industrial design, ergonomics and interior design to create workspaces that are both efficient and beautiful. We carefully consider the ergonomic requirements of your operators to design technical furniture that facilitates the complex interactions between personnel, technology and the environment.

From the layout of the control room, to determining the precise placement of every keyboard, monitor and telephone, not a single detail is left to chance. Viewing angles, touch points, heat dissipation and cable management are just a few of the details we consider when designing command consoles and control rooms.

If you're looking for a workplace as unique as the technical environment you work in, look to Winsted. We understand that in complex technical environments like yours there are countless intricate details to consider. From the comfort of your operators, to the aesthetics of your space, our designers will work with you from initial concept to final installation. We will ensure that your solution is perfectly designed to meet your needs in both form and function. Winsted designers have the insight and experience to take your most complex control room from concept to reality.

Custom control room consoles designed to your exact specifications.

CASE STUDY: PALM JUMEIRAH

PALM JUMEIRAH, DUBAI UAE

Forming the shape of a palm tree, the island, located off the coast of the United Arab Emirates (UAE) in the Arabian Gulf, is 5 Kms by 5 Kms and adds 78 Kms to Dubai's coastline. A massive land reclamation project, it is the world's biggest artificial island. Comprising luxury hotels, exclusive residential beachside villas and apartments, marinas, theme parks, restaurants, shopping malls, and sports facilities, Palm Island has become one of the UAE's 'must see' tourist attractions. In order to ensure the security of its residents and visitors, a comprehensive security plan was deemed integral to the island's success and prosperity. 300 Kms of fibre network connects more than 250 cameras to the island's Command and Control centre. From a centrally located building, the security team survey the island's roads and public areas, with operators monitoring 24/7 for any security or road traffic incidents.

At the heart of the Command and Control room, 3 rows of bespoke consoles accommodating up to 9 operators were designed, manufactured and supplied. Hassan El Banna, Business Development Manager for Siemens BT - Security Solutions SES-AE, who oversaw all the security provision of Palm Island explains: "It was important to have 'Best of breed' products across the island's entire security system, an ethos that was continued through to the Command and Control centre, with the high-specification of the Winsted technical control furniture."

SOT 161, SOFIA BULGARIA

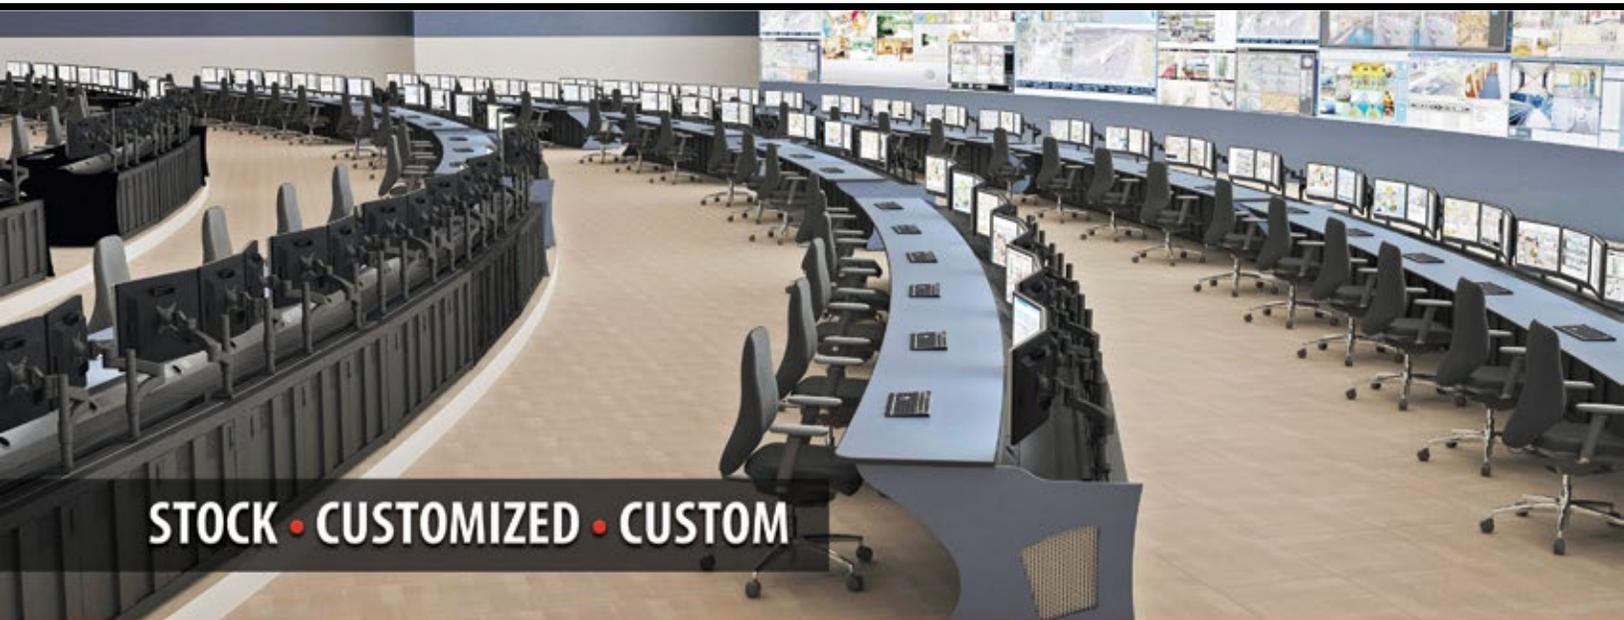

Specialising in delivering a highly professional and focused range of security services, SOT is Bulgaria's largest security provider with 4,500 security staff protecting over 85,000 sites across the country, managed centrally from their National Operations Centre in Sofia. The centre operational 24/7, 365 days a year monitors the assets of numerous companies and properties.

Winsted proposed and delivered a solution based upon a Prestige Sight-Line console, with a stand-alone M-View media wall selected for its modern aesthetics perfect for this contemporary looking environment. The consoles design allow for 19" rack mounted electronic equipment, and use of Winsted's Versa-Trak display mounting system for ergonomic comfort and adjustability. Combined with VESA-compliant brackets, Versa-Trak has enabled screens to be easily attached and provides horizontal and vertical adjustability for optimal viewing angles.

WINSTED SECURITY SECTOR PARTNERSHIPS

Winsted is a true project partner and we pride ourselves on going above and beyond. We can provide Building Information Modeling (BIM) files for Revit®, full CAD drawings in multiple views, photo-quality color renderings of the console design and even animated “walk-through” videos of the proposed installation.
