WINSTED INTRODUCES ENVISION COMMAND CONSOLES

MINNEAPOLIS,— Winsted Corporation (www.winsted.com) is pleased to introduce EnVision Command Consoles designed to offer the perfect balance of form and function for today's control room technology.

With a progressive new modular design, Winsted's EnVision Consoles are available in single, double or triple tier configurations. Each tier supports a 7 ½" high or 15" high slat-wall section with multiple monitor mounting positions for optimal sight lines and ergonomically correct viewing angles. An array of slat-wall accessories are also available to help reduce clutter and keep workstations organized.

Winsted designers believe cable management should be convenient and flexible. EnVision Consoles feature a cable trough that easily hooks onto the slat-wall with no tools required, allowing flexible positioning and fast, easy access for maintenance and upgrades.

EnVision Consoles come standard with Winsted's durable Marmoleum work surface, an environmentally friendly option that is also inherently antistatic and antibacterial, making it ideal for technical environments with sensitive electronics. Endurance Edge and Comfort Edge work surfaces are also available.

Winsted's new EnVision Command Console is the ideal solution for control room environments where flexibility is key.

Winsted catalogs are available in print or PDF format by calling 1-800-447-2257 or emailing info@winsted.com. Log on to www.winsted.com/quote for a free online technical furniture quote. Winsted's equipment layout software (WELS) is available for free at www.winsted.com/WELS. For more information on Winsted products, visit www.winsted.com.
