

EVERYTHING IS UNDER CTRL

THE BEST ACCESSORY YOU DIDN'T KNOW YOU NEEDED.

In cooperation with BARCO, Winsted proudly introduces the CTRL VESA mounting interface.

Barco CTRL is simple to use, simple to set up, and now even more simple to install!

This mounting bracket allows for the CTRL decoder to be mounted to the back of any VESA mounted monitor. By mounting the decoder at the display, it drastically shortens the display cabling and removes the need for costly and troublesome cable extension systems. The open architecture allows plenty of air flow with many cable tie points. Reduce your CTRL installation times with this Winsted VESA Interface!

Product Specifications:

P/N: 10610

- Supports  FDMI MIS-D, 100/75 (100 x 100mm & 75 x 75mm hole patterns)
- Includes all mounting hardware
- Heavy duty 12-gauge steel construction
- Won't warp or bend during monitor adjustments
- Threaded holes for easy attachment
- Adjustable for different monitor connections
- Shortens video signal cables to less than 2 ft.
- No more costly signal extension systems!
- Integrated wire management anchor loops
- Compatible with all Barco SAN-050 units
