

RENDERING REQUEST

Winsted[®]
Control Room Consoles

Winsted will provide a rendering of your design at no charge. This is a very effective method to accurately present your design and make a good first impression on the ultimate decision maker in the organization.

IN ORDER TO CREATE A HIGH QUALITY RENDERING PLEASE SUBMIT A REQUEST TO YOUR WINSTED SALES MANAGER WITH THE FOLLOWING DETAILS:

- 1.** CAD file of the room design (.dwg or .dxf) which will provide accurate room dimensions including: doors, windows, columns, ramps, floor tiers and steps.
- 2.** Digital photos of the room which will help identify colors and other room contents including electronics and accessories that must be accommodated.
- 3.** Work surface and side panel color choices. (Laminate number or PMS color code.)
- 4.** Logo (EPS File) and/or insignia which may be placed on the console side panels or work surface (if Corian).
- 5.** Images to be placed on displays. These should be industry-specific and/or client/consultant/dealer logos.
- 6.** Desired viewing angle(s).

With this information and your final design, Winsted can return a full-color rendering in about 24-48 hours. If some of the information is not available, Winsted can still provide a rendering but the more information we receive, the more realistic the rendering will be.
